

FOUNDATIONS WORKSHOP SERIES

Introduction to ASD and Applied Behaviour Analysis

This session provides an introduction to the Autism Spectrum Disorder (ASD) diagnosis and the science of Applied Behaviour Analysis (ABA). This presentation addresses the common myths and misconceptions behind ABA. This session will explore basic ABA strategies and tools that are commonly used, including: reinforcement, prompting and chaining. Participants will leave this workshop with a specific understanding of ASD and ABA.

Tuesday January 16, 2018 | 6:00 p.m. - 8:00 p.m.

Behaviour Basics: The "B" in ABC

All behaviour happens for a reason! This session will provide an overview of both appropriate and challenging behaviours: how to identify them and how to intervene. Participants will leave this session with new skills in how to identify behaviour; use "ABCs" to detect the reason (function) for the behaviour; and learn about general teaching strategies.

Wednesday January 31, 2018 | 6:00 p.m. - 8:00 p.m.

Antecedents & Prevention Strategies: The "A" in ABC

This session provides information on antecedents: all of the occurrences that come before the behaviour. Antecedents are cues for behaviour; just like a red light cues us to stop driving. In this presentation, we look at discovering different types of antecedents, different strategies to use, and figure out how we know if the strategies are working.

Pre-Requisite: Behaviour Basics: The "B" in ABC

Tuesday, February 13, 2018 | 6:00 p.m. - 8:00 p.m.

Consequences: The "C" in ABC

This session provides information on a key principle of Applied Behaviour Analysis: the consequence. Participants will discover how the consequence (what happens directly after the behaviour) can change future behaviour. Everyone will leave with new information in regards to different types of consequences, how to choose reinforcers, and strategies to use consequences effectively.

Pre-Requisite: Behaviour Basics: The "B" in ABC

Wednesday, February 28, 2018 | 6:00 p.m. - 8:00 p.m.

Location: 69 Flatt Road, Burlington (Boardroom)

Please register by calling Roslyn at (905) 689-4727 Ext. 100

Minimum of 5 participants must be registered or the workshop will be cancelled.
